## Best free automatic call recorder for android

After completing a call, we often say this to ourselves in dissatisfaction, Oh! If only I'd recorded the phone call. It's one of those little problems that we can solve in an instant, but stall it for months or sometimes years. But not anymore! From work-related calls to calls with our loved ones, smartphones now allow us to record our conversations, be it short or long. However, not all Android devices are home to this functionality. How to record a phone call on Android? In addition to using the built-in call recording capabilities of an Android app, you can also record a phone call by putting the call on a speaker and using another smartphone voice recording app. However, this method of 'recording' phone calls proves to be cumbersome and does not ensure clarity. The best possible way is to use third-party apps to record phone calls. that's why we're here to help you by providing the best call recording apps to keep a copy of phone calls (with the use of phone recorders) being easy for you.8 Best Call Recorder Apps For Android For 2020Phone by GoogleCall Recorder - Cube ACRCall Recorder - ACRAutomatic Call RecorderCall Recorder AutomaticAll Call Recorder 2020BackBox Recorder Auto Recorder1. Google PhoneSource:The YouTubePhone app now has a built-in call recording feature. The app comes pre-installed on several Android devices, saving us from downloading any third-party apps. Since it's from Google, we may also feel relieved that the app won't delve into privacy-intrusive activities. The only downside is that the feature is only available on a handful of devices. However, we expect a broader roll-out by the end of 2020. The app informs the recipient that the call is being recorded. This can be a problem for people who want to record calls without notifying the other person. Pros: The app is made by Google and is pre-installed in pixel lineup and Android one devices. Cons: Only available to a handful of users as of now. Google Play Store rating: 3.9 downloads: More than a hundred million2. Call Recorder - Cube ACRThe Call Recorder Cube ACR app is an easy to use app, making it one of the best apps for recording phone calls. Once started, the app will give you a glimpse of how the phone recorder works. The app will automatically record regular incoming and outgoing WhatsApp, Skype, and Viber calls that you have to click on the app widget screen during an ongoing call. When you give the app a few permissions and turn on the cube recorder's connector, you can easily record the calls. Unfortunately, recording VoIP calls (WhatsApp, Viber, or Skype) didn't work for us while testing the app. Pros: Easy Automatic Recording CallConcрем: Lack of VoIP CallGoogle Play Store Rating: 4.2Downloads: More than ten million3. Call Recorder - ACRThe Call Recorder ACR app of NLL originally requires, you confirm that call recording is legal in your country. The app does not need your phone number, which why the Call Recorder ACR app is featured in our best call recorder app list. After you set up the app, the calls (incoming or outgoing) are automatically recorded. You can listen, edit, share, edit numbers, or perform additional tasks with the available call recordings. You can even transcribe the calls, add notes, or view the recordings on the supported cloud storage services. Pros: Ease of UseCons: Comes with adsGoogle Play Store Rating: 3.7Downloads: More than ten million4. Automatic call recorderThe simplicity of the call recorder app is enough to be part of our Android call recording app list. All you have to do is follow the usual method of giving app audio and call access and you will be able to record phone conversations. Calls are added to the app in different sections: incoming calls, outgoing calls, all calls, or important calls. In addition, you can delete or share the call recordings and add a few settings, such as Benefits: Extra SettingsCons: Too many ads, especially in the beginningGoogle Play Store Rating: 3.8Downloads: More than a hundred million5. Call Recorder AutomaticMuch like other call recording apps, the recorder asks for permission to access storage, record calls, manage calls, and contacts on a smartphone. It also ensures that call recordings are legal in your area for security reasons. The app has a simple interface where there are three sections: Incoming calls, All Calls, and Outgoing Calls. You get a few more settings, such as the option to upgrade to Premium and s back up to the cloud, except to delete the call recordings. As a reminder, calls can only be detected when the speaker on the device is turned on. Pros: Cloud Storage BackupCons: Need a speaker to record callsGoogle Play Store Rating: 4.0Downloads: More than ten million6. All Call Recorder Lite 2020The All Call Recorder Lite 2020 is a call recorder Android app that is lightweight and has a simple UI. The app is divided into four sections: all calls, outgoing calls, incoming calls, and important calls. The call recorder app comes with various settings options such as the ability to exclude numbers from which you don't want to record calls, lock the app with the use of a PIN, sharing options, and even the ability to remove ads (which didn't work while I was using it). The app is easy to use and doesn't require a lot of setups to make the call recording process work. But it contains ads. Pros: PIN SetupConserts: Rating adsgoogle Play Store: 4.2Downloads: More than five million7. BlackBox Call Recorder When the Call Recorder app is launched, you'll get a lot of alerts you should know: the app has one-sided recording on some carriers, incompatibility with other voice recording apps, power-saving mode, and a few of it takes before you begin the process. The app, when opened, displays all the call footage and has a hamburger menu on the left side, where lie various other options and a search logo on the right to look for specific call recordings quickly. There are several options under the Settings option and the Remove Ads option that requires you to pay for it. In addition, call recordings can be sorted by duration, date, name and more, making things convenient. Pros: Ease of UseCons: One-sided recordingGoogle Play Store Rating: 4.2Downloads: More than five million8. Auto Call RecorderThe Auto Recorder app, the seventh entry on our best call recording app list, first asks for necessary permissions and is then ready to use it. Like the various phone recording apps, the auto recorder has a page that displays all the recorded calls, with a menu on the left that has settings like All Calls, Outgoing Calls, Incoming Calls, and Favorite Calls, Settings, and more. The right side has the search icon for the ability to search call recordings you need, and then there are ads that appear in the lower part of the app; sometimes they also show up. The usage is pretty straightforward. But I would have liked for less or no ads at all. For a no-ad experience, you can upgrade to Call Recorder Pro by simply shelling out some money. Pros: App Lock optionCons: Lots of adsGoogle Play Store Rating: 4.1Downloads: More than five million9. If you are someone who wants to keep hold of calls made or received, we hope the list mentioned above helps you in some way. As a quick reminder, the Google Play Store has a wealth of options for call recorder apps. We chose those mentioned above based on ratings, personal experience and user reviews. By any means, you can go after the ones you like, even if they're not on our call recording app list, and drop your feedback. Although this is an extremely useful feature, the ability to record a call you make or receive on your Android phone is not something you always find built-in, which makes it, so you'll need some apps if you want to be able to do so. At the moment it's easy to find many call recording apps on Google's Play Store, but there are a few with additional features and improved tools. You can see which ones we recommend that you use in our list below1. Automatic Call recorder Automatic Call recorder is by far one of the best apps in this category as it is not only very easy to use, it is also compatible with almost all Android devices, even the older models. It allows you to record as many calls as you needed, either automatically or manually. This app is free to use, -2. Call Recorder - Cube ACRCall Recorder - Cube ACR is another quite interesting app that gives you even more options when you want to your calls. Other than letting you record your regular calls as expected. It can also be used to record calls in apps like Skype, WhatsApp, Facebook Messenger and many others. The best is, not only is it completely free for everyone to use, you won't even have to deal with ads! Follow this link and see more3. Google VoiceOf course, Google would not miss the opportunity to also have what is one of the best call recording apps for Android. Once Google Voice is installed, you can use a completely free phone number and record all your actions directly on the app. But it's worth mentioning that this isn't available in all regions yet, so your experience may be quite limited. You can go to the Play Store to learn more and find out if it's available to you! Call Recorder ACR is another great alternative that will work in pretty much any Android device, partly because of how easy it is. It can be used to automatically record all calls and also offers support for cloud storage services, allowing you to upload your audios and free up your device storage. Follow this link to download it.5. Smart Call Recorder - SCRSCR is another excellent option you can try out in our list of call recording apps for Android. In addition to recording incoming or outgoing calls, you can also select the source (microphone, skewers, and more) as well as record the audio tapes in different formats. You'll also have the ability to protect your recordings with a password that ensures your privacy. Follow this link and download this app for free6. Smart Mobile Tools (Call Recorder)This call recorder is very similar to most of the other apps on our list. This app also records your high-quality calls without time limits, with a very intuitive design that gives you easy access to your recordings, edit them, and more. In addition, it also organizes your call logs, and the audio tapes are recorded in the folders you select. Follow this link if you want to know more about it!7. RMC: Android Call RecorderNext up, we have RMC: Android Call Recorder, which is not only generally a great app, it's also one of the most versatile you can find today in this category. It works to record any kind of calls you want, also offer support for multiple audio formats, which gives you many more options when saving the files. You can just follow this link to download it.8. Automatic Call Recorder (Amp: Smart Apps)Automatic Call Recorder from Recorder & Smart Apps is one of the most well-rated call recording apps you can download in the Google Play Store, so it's definitely worth taking a look. It also allows you to record and sort all your calls, either manually or automatically. Free to use, this option can also record Skype, WhatsApp and Facebook Messenger calls. Follow this link to download it.9. Call Recorder (lovekara) Call Recorder, developed by lovekara, is another option among the apps for those who want to record their calls automatically, either incoming or outgoing. Apart from that, you can also save all the audio tapes in MP3 and then transfer them to SD card if necessary. It can be used for free, but it also offers an ad-free premium version. Follow Follow link to download it.10. All Call Recorder Lite 2020All Call Recorder Lite 2020 is a much simpler app than the other apps we've talked about in the past, only offering the most basic resources for call recording. If all you want is an easy-to-use app that doesn't have advanced features, this is by far our best recommendation. To download this program, go to the Play Store.11. Call Recorder - CallsBOXCallsBox is a free-to-use app that you can easily record calls on your phone by simply shaking it. The app will automatically record all incoming and outgoing calls and store them on your phone, on the cloud, or share them to other apps such as Skype and WhatsApp.Beyond that, you can also save all audio tapes in different formats and quality, protecting them with a password. Follow this link to download it.12. Automatic Call Recorder ProA name even already suggests this is the perfect app for those who want to record their phone calls automatically. You can even configure it to automatically transfer all recordings to cloud storage services. Automatic Call recorder Pro can be used for free, but it also offers a lot more features in its premium version. You can download it by following this link.13. All Call RecorderAll Call Recorder is a somewhat simpler alternative, especially if we're talking about its user interface. In any case, it will record your incoming and outgoing calls to 3gp files. It allows to automatically send recordings to emails, chat apps, Bluetooth, and cloud storage. You can download it for free by following this link!14. Call Recorder ACR (Cherinbo)And to complete our list, we also have Call Recorder ACR developed by Cherinbo. This app promises to record both sides of any call in a very clear way, in high quality. It offers support for multiple audio formats, is easy to use, and is compatible with almost all Android devices. You can easily download it by following this link.
